PROFILE SUMMARY

Aspiring Software Engineer and B.Tech Information Technology graduate with hands-on experience in full-stack development and Java programming. Experienced in designing and implementing RESTful APIs and managing database architectures. A highly adaptable and effective communicator, dedicated to writing clean, maintainable code and solving technical problems to support organizational goals in a fast-paced environment.

EDUCATION

B.Tech, Information Technology - Adhi College of Engineering and Technology	CGPA: 7.95 (up to 6th sem)
Higher Secondary School - GHSS Peerkankaranai	Percentage: 60%

TECHNICAL SKILLS

- Programming: Java, C
- Web: HTML, CSS, JavaScript, React, Node.js
- Database: MongoDB, MySQL
- Tools: Git, VS Code

PROJECTS

Smart Residential Parking

- Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) to enable real-time parking space discovery and seamless booking.
- Engineered robust RESTful APIs for user management and booking workflows, while leveraging MongoDB to implement efficient location-based search functionality.
- Designed a responsive and dynamic frontend with React.js, directly enhancing the user experience by displaying live parking availability and status.

Software That Captures Trip Related Information

- Engineered a travel-centric mobile application using Flutter to automatically capture and process trip data by leveraging device sensors including GPS, accelerometers, and gyroscopes.
- Integrated AI/ML capabilities and the Google Activity Recognition API to accurately identify travel modes and patterns, supported by a scalable backend built with Node.js and MongoDB.
- Developed a real-time analysis dashboard handling secure, anonymized travel data on a government-approved cloud, delivering a cost-saving and highly accurate alternative to traditional transportation surveys.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ algorithmic and data structure problems across LeetCode and CodeChef, demonstrating consistent analytical and problem-solving skills.
- Completed a Full-Stack Development internship at Cognifyz Technologies, gaining practical experience in building dynamic web applications utilizing React and Node.js.
- Secured First Prize at the Adhi College of Engineering & Technology department-level Project Expo 2K25 for outstanding technical innovation and execution.
- Earned an NPTEL certification in Programming in Java with a score of 85%, securing the Silver Badge.
- Completed an NPTEL certification in Cloud Computing, passing with a final score of 66%.
- Presented a technical paper on the development of the **Smart Residential Parking Web Application** at the **International Conference on [ICSCSS 2026]** manuscript accepted for publication in the **IEEE Xplore Digital Library**.
